

# NAB/1K AE

**ECO – FRIENDLY IMPREGNATING RESIN**

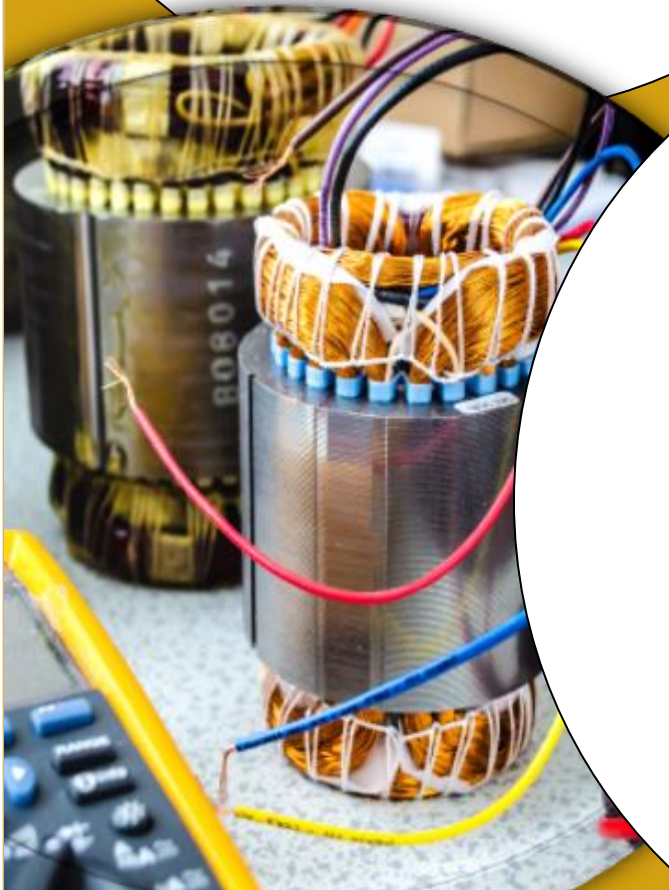

## POWER-UP YOUR ENVIRONMENTAL ATTITUDE

- Low VOC
- The impregnant is odourless at room temperature. Smell does not spread from the bathtub after operation
- There is no need to burn the vapour during curing
- The impregnant is fast in curing

## YOUR ADVANTAGES

- Exceptional mechanical strength
- Excellent humidity and corrosion resistance
- Slightly elastic after curing, what reduces the risk of cracking and crushing of the cured impregnant
- Low viscosity ensures ideal flow into the winding and thus its high filling, good impregnation of insulating materials
